

Allowing cell phone use during flight is irresponsible and a bad idea. There is no hard evidence that cell phone usage doesn't interfere with navigational equipment. Cell phone use would enable terrorists to coordinate a plan of action more efficiently. The NPRM would leave it up to flight attendants to police the use of cell phones on board the aircraft compromising our ability to maintain a safe, secure cabin environment and to conduct emergency evacuations. It would make an already tense cabin environment even more stressful.
